ABOUT ME

Hi, I'm Sofia! I'm a developer with a strong passion for backend systems and object-oriented programming. A fast learner with broad IT expertise and a genuine curiosity for technology. I enjoy solving complex problems, learning new technologies, and building reliable, maintainable software.

PREV. JOBS

Lead Game Programmer

Filimundus AB (Nov 2024 - Sep 2026)

During my time at Filimundus, I specialized in game programming and tooling using mainly Unity, C#, Node.js, AWS and SQL while contributing across multiple areas of indie game development.

- Shipped multiple new games and 150+ updates from start to finish.
- Ported BRIO World - Railway from mobile to Steam & Nintendo Switch.
- Shipped a custom Node.js CMS for our streaming service Barnvärlden.
- Set up TeamCity (CI/CD), automating building, testing and publishing of our 25+ games.
- Achieved a 4,000% increase in user reviews quarter-over-quarter.
- Managed our collaboration with Epic Games, being an exclusive early access partner on mobile.
- Responsible for all customer emails, handling roughly 400 support cases per quarter.
- Held collaborations with Stockholm University to introduce game students to level design.

Contractor

Appen (Jul 2019 - Feb 2024)

Long-term contract work for several undisclosed FAANG companies.

EDUCATION

Stockholm University (2021-2024)
Bachelor of Science in Computer and Systems Sciences

Drottning Blankas Gymnasieskola (2018-2021)
Media and Information Technology

SKILLS / TOOLS

- C#, C++, JavaScript, Python
- Unity, Unreal
- Node.js
- AWS & Google Cloud
- MySQL
- Steamworks, Nintendo eShop, Epic Games
